

TrueStim

TREAT · RECOVER · PREVENT

What is TrueStim NMES?

TrueStim is an electric muscle stimulator utilized for treatment, recovery, and prevention of WC injuries. It is a device used for soft tissue healing, adjunctive relief of pain, swelling, and inflammation. It will insure healing more quickly and effectively, decreasing medication use, and allowing patient to return to full status more quickly. It has six channels with twelve treatment modes and is blue tooth wireless.

Treatment Indications

Muscle Weakness · Sore Joints · Muscle Spasticity · Prevention of Atrophy · Decreased Range of Motion · Pain Due to Muscle Weakness · Neuromuscular Deficits Effects Muscle Strength and Function
