

# COLD COMPRESSION DVT

## COLD COMPRESSION DVT PREVENTION

### *Did You Know VPulse*

Provides convenient home therapy, improve compliance, and reduce total costs?

- No upfront financial investment
- No product fulfillment
- No billing or collections
- No long-term contractual commitments.

MedXSales can offer this ancillary service to your patients and help your practice generate more revenue. VPulse has **three distinct therapies** to improve patient outcomes. It can also reduce the total cost of an orthopedic episode while increasing patient satisfaction. Additionally, VPulse offers rapid impulse calf compression to help prevent deep vein thrombosis (DVT). VPulse combines motorized cold therapy and wound compression to help reduce operative site discomfort and inflammation.

Many practices, utilizing an in-house durable medical equipment program, choose third party companies to provide this device to patients. MedX Sales has now made this ancillary service available to everyone.
